Document Watermark

This document has a declarative **DRAFT** watermark rotated diagonally across every page. The watermark is specified via a <meta> tag in the head.

Page 1 Content

The watermark is rendered behind all content with 18% opacity and -35° rotation, making it clearly visible without obscuring the text. It repeats on every generated page.

The watermark appears here too — on every page, always behind the content. This is useful for:

- Marking documents as **DRAFT**, **CONFIDENTIAL**, or **COPY**
- Watermarking invoices before payment confirmation
- Adding company branding to exported reports
